

**For Immediate Release:**

**Nueva Generacion Manufacturas  
Acquires Regal Beloit Corporation Capacitor Business**

Mexico City, Mexico: Nueva Generacion Manufacturas (NGM), the world-wide leader of AC film and electrolytic capacitors announces the agreement to acquire capacitor lines manufactured and sold under the Genteq and Proline trademarks from Regal Beloit Corporation (RBC). Genteq is the rebranding of Regal's GE ECM, GE Capacitors and GE Commercial Motors divisions.

NGM is excited about the acquisition as it solidifies NGM as the market leader and expands its capacitor offering into large can DC electrolytic capacitors. Genteq's reputation in the market place for product quality and reliability is second to none, and NGM's intention is to continue to manufacture under the same conditions that have allowed GE and RBC's market recognition.

In addition, the acquisition provides NGM with more engineering and design talent and an expanded manufacturing footprint. The established manufacturing location, which is in Ciudad Juarez, will give both NGM and Genteq customers respite during any adverse market conditions.

During the transition process NGM will be constantly touching base with customers about the progress of the acquisition which we anticipate will be finalized by April 1, 2019

**Nueva Generación  
Manufacturas S.A de C.V**
